SUMMARY

Full-Stack Developer with 2+ years of professional experience developing enterprise applications, AI-powered solutions, and production-ready web platforms. Next.js expert, experienced in building secure, scalable systems with modern development practices, and currently expanding my expertise in AI agents, cloud technologies, and DevSecOps.

SKILLS

Languages & Frontend: TypeScript, JavaScript, Python, C, SQL, Next.js, React.js, Docusaurus, HTML5, Tailwind CSS, Material UI, Shadcn, Bootstrap.

Backend & Databases: Node.js, Express.js, REST APIs, PostgreSQL, MySQL, supabase, Prisma ORM, Auth, Payment Gateway.

DevOps & AI: Cloudflare, Nginx, Linux, Git, CI/CD, AI Agents, RAG Systems, Prompt Engineering, Spec-kit, LLM Integration

EXPERIENCE

Digital Information Systems Pvt Ltd. (DIGINFO)

March 2024 – Present

Full-Stack Software Engineer

Karachi, Pakistan

- Developed and maintained full-stack web applications using Next.js, React, Node.js, Prisma, and PostgreSQL.
- Implemented Single Sign-On (SSO), payment gateway integrations, and RESTful APIs for enterprise applications.
- Built AI-powered features, dashboards, and internal business tools while managing production deployments with Cloudflare and Nginx.

Hameed & Azra Awards

Contract

Web Developer

Remote

- Built a responsive website for an academic research awards program using Next.js and TypeScript.

NS Engineering Works

Contract

Web Developer

Remote

- Delivered a company website for NS Engineering Works with reusable components and cross-device layouts.

Intellecta Genius Fest

Contract

Web Developer

Remote

- Created an event registration platform with dynamic, validated forms for Intellecta Genius Fest.

YoungDev

Aug. 2024 – Sep. 2024

Frontend Developer Intern

Karachi, Pakistan

- Built responsive, animated React interfaces as a Frontend Developer Intern at YoungDev.

PROJECTS

Autoverse | React, JavaScript, Python, RAG, Agentic AI

- Developed a reusable **RAG-powered npm package** for integrating conversational AI into applications.
- Implemented document retrieval, context-aware responses, and agentic task execution using modern AI workflows.
- Designed modular architecture for easy integration, extensibility, and developer experience.

Personal AI Employee | AI Agents, Obsidian

- Developed autonomous AI workflows for scheduling, information retrieval, and productivity automation.
- Implemented reusable agent skills, memory management, and task orchestration for intelligent assistants.

- Explored practical applications of Agentic AI for real-world business and personal use cases.

Physical AI & Humanoid Robotics Book | TypeScript, Docusaurus

- Built an interactive documentation platform focused on Physical AI, robotics, and AI-native development.
- Structured technical content using documentation-driven and specification-first development practices.
- Optimized documentation architecture for maintainability and future expansion.

DGEnterprise | Next.js, TypeScript, Material UI

- Developed enterprise-grade business applications with secure authentication, profile management, and analytics modules.
- Implemented **Single Sign-On (SSO)**, payment gateway integrations, and database-driven business workflows.
- Managed production deployment using Cloudflare, Nginx, NSSM, and IP-based request routing.

DGMagazine | Next.js, JavaScript, Node.js, Prisma, PostgreSQL

- Developed scalable content management and publishing solutions with advanced search capabilities.
- Designed backend APIs and database architecture for efficient content storage and retrieval.
- Enhanced application performance through production deployment optimization and caching strategies.

Learning Management System | PHP, MySQL

- Developed multi-role educational management software with secure access control and workflow automation.
- Implemented course management, attendance tracking, grading, and academic administration modules.
- Built responsive dashboards and integrated backend services for efficient institutional management.

Other Projects

- Developed multiple corporate websites, internal business applications, Python automation tools, Streamlit dashboards, and CLI utilities.
- Worked with C, JavaScript, PHP, Python, TypeScript, PostgreSQL, MySQL, Tailwind CSS, Prisma, and cloud deployment technologies across personal, academic, and professional projects.

CERTIFICATIONS

Governor Initiative for AI, Web 3.0 & Metaverse (GIAIC) <i>AI Agent Development</i>	Feb. 2024 – Present
Panaversity <i>Agentic AI Architect Program</i>	August 2026 – Present
Panaversity <i>OpenClaw for Business Professionals</i>	May 2026
YoungDev <i>Tailwind CSS</i>	September 2024
DGAcademy <i>Secure Linux Training Program</i>	December 2024
